

A PACS SYSTEM THAT ALLOWS ACCESS TO YOUR X-RAYS FROM ANYWHERE, ANY TIME.

FEATURES & BENEFITS OF CENPACS

VET-SPECIFIC CLOUD BASED PACS

Store all your Radiology Digital images from any modality in the cloud.

FLEXIBILITY

X-ray, ultrasound, CT, MRI, microscopy, endoscopy, PDF, videos and more...

WEB ACCESS

Viewer includes Vet-Specific tools and structured reporting.

SECURITY

Always up, offsite data storage for 7 years.

WORK FROM ANYWHERE

View radiology images from any device with internet connectivity, including mobile phones and tablets.

LOWER COST OF OWNERSHIP

One time setup fee, one modality configuration included for free. No ongoing IT maintenance costs.

Meet CenPACS..

Cloud-based PACS storage that won't cost you a fortune.

CenPACS cloud-based PACS storage is used to securely store DICOM medical images from any modality in your practice (e.g. digital X-ray, ultrasound, CT, MRI etc) in the cloud so that images can be accessed from anywhere and on any device with an internet connection (modalities need to have DICOM Send capability).

Available CenPACS package options:

The CenPACS subscription price is based on the total amount of data stored in your CenPACS cloud account per year. There is no limit to the number of studies you can upload.

Local in-clinic PACS options are also available, including a hybrid PACS configuration which keeps your local PACS and cloud PACS synchronised at all times, contact us for more information.

	EQUIPMENT / USAGE	RECOMMENDATION	DESCRIPTION
Solo Veterinary Practice	1 ultrasound device, 1 x-ray device, 1 – 2 studies/day	CENPACS VET-10	Ideal entry-level package for low daily volumes and smaller studies
Small Group Practice	1 – 2 devices, 3 – 10 studies/day	CENPACS VET-25 or CENPACS VET-50	Suitable for moderate daily data, but an upgrade may be required for larger studies
Medium-sized Practice	X-ray, ultrasound, 10-20 studies per day, possible CT/MRI on top	CENPACS VET-100	Fits regular use and growing storage needs over time
Large group Practice or Animal Clinic	Several modalities, >20 studies/day	CENPACS VET-250 or CENPACS VET-500	Covers high daily study volumes and larger data sizes
Specialised Clinic	Large datasets, many modalities	CENPACS VET 1000 or CENPACS VET 2000	Designed for high-throughput and large-scale long-term archiving
